Case Study

How does Changsha Meiyu Electrical operate efficiently?

揭秘！长沙美宇电器如何高效运转？

长沙美宇电器有限公司

长沙美宇电器有限公司是湖南目前实力雄厚的精密钣金、轨道交通、铝合金焊接结构件及一站式成套电器设备供应商之一，是集设计、生产、销售、服务于一体的高新技术企业。

美宇电器作为湖南地区钣金行业领先者和铝合金机加、焊接的优势企业。工厂内部拥有来自国内外的先进生产设备，诸如Trumpf（通快）激光切割机、Bystronic（百超）激光切割机、大族激光切割机、沪工等离子/火焰切割机以及AMADA 数控30工位塔式冲在内。

Changsha Meiyu Electrical

Changsha Meiyu Electrical is one of the most powerful suppliers of precision sheet metal, rail transit, aluminum alloy welded structural parts and one-stop complete electrical equipment in Hunan. It is a high-tech enterprise integrating design, production, sales and service.

As a leader in the sheet metal industry in Hunan Province and an advantageous enterprise in aluminum alloy machining and welding. The factory has advanced production equipment from home and abroad, such as TRUMPF laser cutting machine, Bystronic laser cutting machine, Han's laser cutting machine, Hugong plasma / flame cutting machine and AMADA CNC 30 station tower punch.

美宇电器

选择Lantek的理由

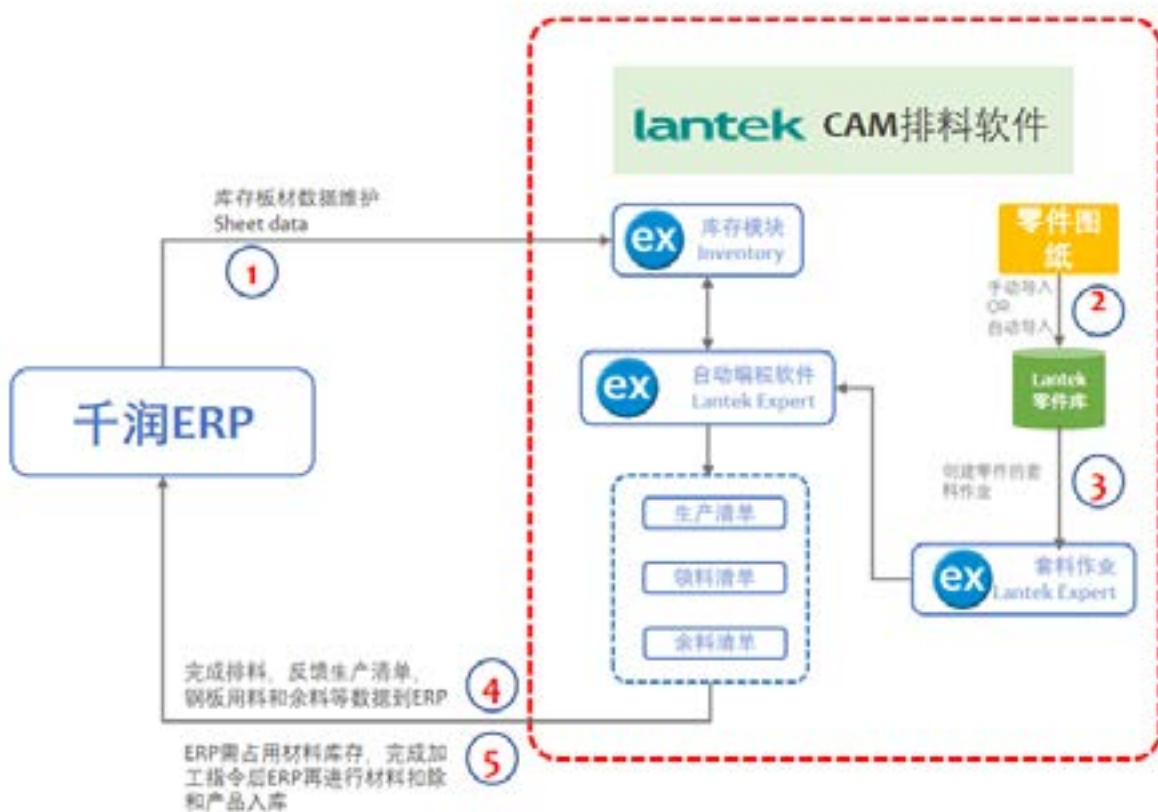

如何将不同品牌的先进切割机统一管理起来，在减轻企业用人成本的同时还能最大化设备的价值呢？

长沙美宇电器相关负责人一直在思考以及尝试，直到一次偶然的的机会，他了解到 Lantek Expert 软件。在 Lantek 工程师细心而专业的演示下，他最终选择 Lantek 来为工厂的生产效率添砖加瓦。

Why Lantek?

How to manage the advanced cutting machines of different brands in a unified way to maximize the value of the equipment while reducing the labor cost of the enterprise?

The relevant person in charge of Changsha Meiyu electrical has been thinking and trying to solve this problem. He learned about the Lantek Expert software by chance. Under the careful and professional demonstration of Lantek engineers, he finally chose Lantek to contribute to the production efficiency of the factory.

实施成果

目前，Lantek Expert 软件已经在长沙美宇电器充分证明了其可靠性和高效性，机床操作人员、编程人员及公司管理者也对该软件表示非常满意

1. Lantek Expert 高效管理该工厂多品牌切割机，对接原有ERP系统。
2. Lantek Expert 大大提升了编程效率，在工厂新增两台新下料设备的情况下，编程人员不增反减，由原来的5人变为现在的4人。
3. Lantek Expert 内置超级算法，该工厂材料综合利用率提高3%，机床的切割效率提升，能耗也相应减少。
4. 工厂后期若购买其他同品牌的新下料设备，也无需采购新的编程软件，Lantek Expert 仍能兼容并稳定高效地运行。

Results

At present, lantek expert software has fully proved its reliability and efficiency in Changsha Meiyu Electrical. Machine tool operators, programmers and company managers are also very satisfied with the lantek software.

1. Lantek expert efficiently manages the multi brand cutting machines in the factory and interfaces with the original ERP system.
2. Lantek expert has greatly improved the programming efficiency. Two new equipment added in the factory while the number of engineer has reduces from 5 to 4.
3. Lantek expert has built-in super algorithm. The comprehensive utilization rate of materials increased by 3%, the cutting efficiency of the machine tool is improved, and the energy consumption is reduced accordingly.
4. If the factory purchases other new blanking equipment of the same brand in the future, it does not need to purchase new programming software, lantek expert can still be compatible and operate stably and efficiently.
